DETAILED ACTION

1. This Office Action is the answer to an IDS received on 7/23/2004, which paper has been placed of record in the file.
2. Claims 1-6 are pending in this application.

Drawings

3. The submitted drawings are acceptable for examining purposes.

Claim Rejections - 35 USC § 112

4. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. A key limitation in independent claim 1 says “switchover means for selecting one of modes for navigation mode for displaying navigation image provided by the map image data means and non-navigation mode for displaying non-navigation image provided by the non-navigation data mean; and processor means for displaying said” this is critical or essential to the practice of the invention, but not included in the claims is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

In other words, Applicants claim about “switch over means for selecting one of modes for ... displaying images...” the specification does not support that limitation; the examiner only see a disclosure that “selecting” or “switch over” functions can be made. This is a core/key concept of this claimed invention – other dependent claims are rejected with the same rationale because they inherit that same defective from their parent claim 1
